## \$99 Dollar Custom Web Design DONE Today!

If you've been 'thinking' about getting a website designed for yourself or your business, **STOP THINKING** about it and **DO IT TODAY FOR 99 Dollars!**

If you're a business, **having a presence on the internet** is not only a neat idea but **paramount to your success**. Yes, it can be expensive to have your own website custom designed – \$300, \$600, up to \$2500 or more.

Now, you can eliminate the "it's too expensive" argument and **get on the internet TODAY with your own \$99 Dollar Web Design** built for YOU!

My goal is to get **100 NEW clients** up and running on the internet as quickly as possible. To help streamline things, I've created a [content information form](#) for getting the most accurate web content information from you for your site.

Please use it as a guideline when gathering your web site information.

### What's Included for \$99:

- **FREE Initial Consultation** (to help you figure out what you want to do)
- **1 YR FREE Domain Name** (if you don't have one)
- **3 Months FREE Web Hosting** (\$5 mo after that)
- **Up to 3 Pages** built for your web content (ie, Home, About Us, Services)
- **Custom Designed Graphical Header** for your site
- **Basic SEO** ready to submit to search engines

The \$99 site is **NOT** a used up web template or theme that everyone else has for their site. Your site is 'custom designed' for YOU.

\$99 Web Design

### Here's What YOU Need to Get Started:

- 1) **Some ideas for Domain Name** (I can help you with this at no charge)
- 2) **Clear idea of website message** (What is the website about? Again, I can help with this)
- 3) **Content that you want included** (Logo, pictures, contact info, links, any copy you have for the site)

[Go to our content information form to enter your site details.](#) If you need a consultation, call me at

## Frequently Asked Questions:

**Q – How can you do this for such a low price of \$99 with FREE Domain and FREE Hosting included?**

A – It's about volume. I've been designing sites for over 15 years and have learned to complete sites quickly when I have all of your information. Overhead is lower since we own our own servers. Domain renewal after your FREE year is \$25. After your FREE 3 months, Web Hosting is only \$5 month (\$60yr) after that. It's my hope that you'll become a longtime customer and tell other people about our services.

**Q – How much \$ do I need up front to get started?**

A – Usually \$25 deposit when we start, and the balance paid upon completion and approval of your site.

**Q – Is the FREE Domain registered in MY name or yours?**

A – The Domain is YOURS. You own it. You control it.

**Q – What if I need my site updated from time to time after you've built my \$99 site – do you do that?**

A – Yes. There is a charge of \$15 for updates and copy changes/additions. The fee could be higher for adding new pages, navigation, forms, etc, depending upon your needs.

**Q – Do you do Logo Design as well?**

A – Yes. If you do not have a logo for your web site, I can design one for your site for \$25. If you need it for letterhead, flyers, banners, and other print, the process is a bit more involved and the price starts at \$50.

**Q – Can you submit my website to all of the search engines after you build it?**

A – Yes. This is done manually and the fee is \$29.95 for up to 20 search engines

**Q – Do you guarantee good search engine rankings?**

A – No. While we do basic SEO with your \$99 site to get it ready for submitting, the full SEO process is much more involved. Companies charge up to \$1500 and more and still have troubles with guarantees. If this is something you'd like to know more about, we can discuss it.

**Q – What if I need more than 3 pages for my site? Can you do that and how much is it?**

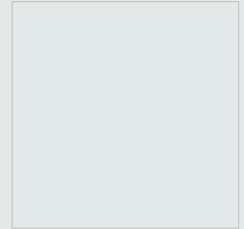

A – Yes. Each site is different. I've designed sites up to 50 pages and more. The 'average' site is about 8 – 10 pages and cost \$400 – \$600. You can spend up to \$2500 or more depending on your needs. Let me know what you need.

## ● Visualize Your Web Design. SEE IT!

Whenever I've designed web sites for clients, the first question I've asked is...

**“What are you trying to accomplish?”**

I suggest looking around the internet and choosing about 3 to 5 web designs that you like. You may like the navigation of one site, the general layout of another, the Flash banner of another, the colorful graphics, the forms, etc. Doing this gives us a more clear picture of what you want.

Basically, if you follow these 4 steps, the better your web design will be. Let's have some fun!

### 1. Vision

Outline what you want – be as clear as you can – surf web designs for ideas

### 2. Budget

How much do you want to spend? Stay within your means for your web design.

### 3. Get It Together

Gather any documents, pictures, graphics, text, etc, that you want included in your design. We'll organize together or just give it to me to organize.

### 4. Communicate

Talk to me. What are you thinking for your design? Make sure I know your ideas.
